

Clematis x jackmanii 'Superba'

Jackmanii Clematis

DESCRIPTION

In comparison to the long time garden favorite *Clematis* 'Jackmanii', 'Jackmanii Superba' is considered to be an improved version featuring a more profuse bloom of more rounded and slightly larger flowers.

This large-flowered, late-flowering hybrid clematis is a deciduous perennial vine with velvet purple flowers (to 5" diameter) cover the vine with bloom from late spring to early fall (June to September).

Flowers are followed by silky seed heads.

Bloom from June through July.

Vine is rabbit and deer resistant .

Roots must be kept cool.
