

Delosperma cooperi

Hardy Ice Plant

DESCRIPTION

This is a succulent mat-forming plant that typically grows to 3" tall and spreads quickly to 24" or more.

Stunning tri-colored flowers cover a tight, fast spreading mat of succulent evergreen foliage.

Succulent, fleshy, cylindrical, medium green leaves work as a border and rock garden planting.

Foliage is covered with transparent flakes that somewhat resemble tiny pieces of ice.

The flowers are most prolific in spring, reappearing throughout the summer.

QUICK FACTS

Plant Height: 3"

Plant Width/Spread: 12-24"

Hardiness: Zone 5-10

Flower Color: Purplish-pink

Sun/Light Exposure: Full sun

Bloom Time: June to September
