

Hemerocallis 'Black Eyed Stella'

Black Eyed Stella Daylily

DESCRIPTION

Black Eyed Stella Daylily has a nice bright yellow bloom with a dark orange / red throat.

Foliage is a good green color and very grass-like, making a good contrast against the bright yellow flowers.

Blooms start in early summer, and extend all the way through till very early fall in most climates.

This variety is an excellent re-bloomer, rather than just one heavy bloom period in early summer.

Attracts butterflies.
