

Sedum rupestre 'Angelina'

Stonecrop Angelina

DESCRIPTION

Wonderful low evergreen groundcover for sunny areas with poor dry soil and does well with occasional foot traffic.

This succulent forms a trailing mat of golden-yellow in containers or in a rock wall.

Clusters of yellow starry flowers appear during the summer.

Plants may be pruned back at any time if they get too large.

Foliage sometimes develops beautiful amber tones in the autumn and winter.

Drought tolerant and attracts butterflies and hummingbirds.

Deer and rabbit resistant.
